Today's Security Challenge

Enterprises today know that adopting the cloud is no longer an option—it is a business imperative to remain agile and competitive. While the cloud enables enterprises to outsource their infrastructure, the responsibility to protect their customer and business information remains critical. A disclosure or breach can cost millions of dollars in lost revenue, compromise customer and intellectual information, brand reputation, and the overall livelihood of the business.

CipherCloud is focused on one thing—enabling your business to adopt the cloud with confidence. We deliver solutions that let you understand how the cloud is being used, manage user activity, and protect your sensitive data in the cloud.

In order to enable the cloud, you need to ensure:

- **Visibility:** discover and analyze what clouds are in use, where your data is going, and what your users are doing
- **Data security:** proactively protect sensitive data continuously, before it goes to the cloud
- **Compliance:** meet increasingly strict requirements for data privacy, and sovereignty
- **Control:** avoid security silos and enforce policies consistently across many cloud applications

CipherCloud understands that cloud security needs to be dynamic, persistent, and seamlessly integrated with your enterprise.

CipherCloud Ensures Visibility and Data Protection

CipherCloud is the pioneer in delivering effective cloud security, enabling you to overcome the risks of data privacy, legal sovereignty and regulatory compliance. Using ground-breaking technology, we protect the entire lifecycle of your structured and unstructured data. Our comprehensive platform includes:

- **Advanced Data Protection:** FIPS 140-2 validated encryption, enterprise key management, tokenization, and malware detection
- **Cloud Discovery and Analytics:** visibility and control over Shadow IT for more than 15,000 cloud applications
- **Content Control and Monitoring:** advanced collaboration control and governance with integrated data loss prevention, selective encryption, analytics and anomaly detection

CipherCloud Delivers Multi-Cloud Control

CipherCloud provides centralized management, consistent policy controls, and unrivaled dashboard visibility across a wide range of business-critical clouds including: Salesforce, Force.com, AppExchange products, ServiceNow, Box, and many other applications. Solutions are designed to meet enterprise use cases, with flexible deployment in the cloud, on-premises, or both.

CipherCloud Delivers Customer Success

CipherCloud works hard to protect an enterprise's sensitive information and we help them to comply with industry and global regulations, and we provide even further value in our solutions' flexibility and ease of use. What we bring to the table are five advantages that make our total value of ownership much greater than any other cloud security and cloud access security broker solution.

- Fast to deploy with multiple deployment options
- Easy to scale and manage
- Deep cloud application knowledge
- Commitment to market leading innovation
- Total focus on customer success

CUSTOMER EXAMPLE

"The key benefits for using CipherCloud have been to encrypt our sensitive data, deliver a high level of security and flexibility in the cloud, and the lowering of our operational costs of securing our most important data."

Niko Klyuyer
—General Manager,
Caribbean Credit Bureau

CipherCloud, the leader in cloud security and visibility, enables companies to adopt the cloud while ensuring data protection, compliance and control. CipherCloud delivers a comprehensive multi-cloud security platform that integrates advanced FIPS 140-2 validated data protection, content control, monitoring, cloud discovery and risk analysis. The largest financial services, insurance, healthcare, telecommunication, and gaming companies across more than 25 countries have put their trust in CipherCloud.

CipherCloud, named as SC Magazine's Best Product of the Year, has received investments from premier venture capital firms Andreessen Horowitz, Transamerica Ventures, Delta Partners and T-Venture, the venture capital arm of Deutsche Telekom.
